

## APRIL SHOWERS SHOOTOUT RULES

### Shootout Format:

Each coach selects three (3) skaters from their team (*players with penalty time remaining at the end of the game are not eligible*) to take [penalty shots](#) one at a time against the opposing [goaltender](#), with teams alternating shots (*visitors shoot first*). After the six players have all taken their shots, the team with the most goals is declared the winner. If the shootout is still tied after three skaters from each team have shot, the shootout continues one skater at a time until one team has won the advantage (assuring that each team has taken an equal number of shots). All players in uniform must shoot once before any player can shoot for a second time. The shootout may end earlier, if one team has scored more goals than the opposing team could score with its remaining shooters.

**NO GAMES WILL END IN A TIE**
